Answer to the quiz

```
class EPL_Team :
    title = 0
    def __init__(self, team, song = None):
        self.team = team
        self.song = song
    def show Club info (self):
        if self.song == None:
            print('Name:', self.team, 'I', 'Song: No Slogan')
        else:
            print('Name:', self.team, 'I', 'Song:', self.song)
        print('Total No of titles:', EPL_Team.title)
    def increase Title (self):
        EPL_Team.title = EPL_Team.title + 1
        return EPL_Team.title
    def change Song (self, change)
        self.song = change
```
